---

**Languages:** HTML, CSS, JavaScript, JSON

**Frameworks:** React, Redux, Bootstrap, Sass

**Soft Skills:** Problem-solving, Communication, Teamwork, Time Management, Adaptability

**Areas of Interest:** Front-end Development, Web Design, Responsive Design, Progressive Web Apps, User Experience (UX).

## Projects

---

### Personal Projects | *React.js*

- Design and develop a portfolio website to showcase your skills, projects, and experience.
- Include sections for projects, blog posts, and contact information.
- Implement responsive design to ensure compatibility across devices.

### e commerce Website | *React.js*

- Create a fully functional e commerce store for a specific niche or product category.
- Implement features such as product listings, shopping cart, checkout process, and payment integration.
- Optimize the website for SEO and mobile usability.

### Admin-Dashboard | *React.js*

- A Dashboard website is a system that allows users to monitor and manage data and information centrally from multiple sources. It can be designed for various purposes such as business operations management, application performance monitoring, or data analysis. The dashboard provides an easy-to-use interface, customizable reports, and concise information in a centralized manner to help users make decisions based on current data and analytics.
